

KING COBRA™ FEATURES

UL Classified in two styles to the NFPA 1971 - Current Edition.

Patterned to comfortably fit head with or without SCBA mask on.

Classic Style™

(Shown in Nomex®/Lenzing FR™ Blend)

Style No. 3018185

Ultimate Style

(Shown in Nomex®/Lenzing FR™ Blend)

Style No. 3038185

Flat stitched seams for improved comfort and fit - won't dig into your skin and eliminates bunching.

Xtra-Heavyweight 1/2" wide elastic face opening stretches to full 17" for easy donning and snug fit around SCBA mask.

Seamless chin area and improved patterning for better comfort, fit and protection.

COMFORT-PLUS
super wicking, flame resistant liner for unparalleled comfort and thermal protection.

Bottom edge bound with self-material bias binding.

All sewing done with 100% NOMEX thread.
Rib-knit construction for better stretch and recovery.

CLASSIC™ style hood is designed to provide double layer coverage of the neck, upper chest and the top of the shoulder blades. Shoulders are contoured to reduce bunching of the bib. To ensure the hood stays tucked in, we've made the hood 3" longer in the front than NFPA requires.

ULTIMATE™ style hood is designed for maximum double layer protection. Hood covers chest, shoulders and shoulder blades.

QUALITY

PGI's KING COBRA™ hoods are manufactured to the highest quality standards in the industry...using the best quality and most widely accepted flame resistant fabrics available. Hoods are made from four proven flame resistant materials: NOMEX® /LENZING FR™ blend, PBI /LENZING FR™ blend, P84™/LENZING FR™ blend. All provide excellent flame resistance and are preshrunk to minimize shrinkage. Hoods can be machine washed with no loss of flame resistance.
