

# MARTEL'S MDP3

The Digital Partner 3 is a Police Camcorder in car video system with a digital wireless microphone that can record police stops from inside and outside the vehicle. The police officer can remove the camera from the mount to take photos and video of the crime scene. This system can be mounted on the visor or on the dash. Martel has been manufacturing police car video systems for over 20 years. The MDP3 is a perfect multiuse video system for small to medium police departments.

- Hybrid Recording to DVD or Memory Card.
- 2.7" Touch Screen LCD Display.
- 2000X Digital Zoom / 60X optical.
- 2.4 GHz Digital Wireless Microphone.
- Special Wired remote control allows and officer total control over the system. Record, Snap Digital Photos, Stop, Zoom in & out. Automatic LightBar Record activation included.

## Features:

- 2.4 GHz Digital Wireless Microphone - 40 digital channels ensures multiple systems can operate in close proximity without interference. Transmitter charges inside the cars docking station above the camcorder. Wireless microphone will activate the camcorder and start recording remotely.
- Record 11 hours of video directly to a with optional 16GB Digital Memory Stick. (Optional 16 GB Pro Duo Memory stick records 11 Hours of video, \$149) or you can Record up to 1 hour on 3 inch DVD inside the camera.
- 2.7" Touch Screen LCD Display for playing back the video from a police stop in the car.
- Special Wired remote control allows an officer total control over the Police car camera system. Record, Snap Digital Photos, Stop, Zoom in and out without touching the police camcorder system. The 2.7" Touch Screen LCD screen provides exceptional viewing clarity.
- The Digital Partner Police in-car video system has a Light bar activation. a special cable that will automatically put the camera into record mode when your light bar is activated.
- MDP3 police in car video Camera has Super Steady Shot Picture Stabilization System - Picture stabilization system that uses motion sensors to detect and compensate for camera "shake" without compromising picture quality like some other digital stabilization systems.
- Our Police Car Camera records in the DVD Video Format  
The DVD recording format is MPEG2 (SD) This format delivers digital picture and great sound quality on DVD. Playback of these DVDs couldn't be simpler (depending upon the playback device used). After finalizing the DVD in the camcorder, the disc can play back in most DVD Players
- Hybrid Recording to DVD or Memory Stick Media - Hybrid recording technology delivers a new level of flexibility for transferring your video footage and digital photos from the camcorder to compatible viewing devices. Record to DVD media, or choose instead to record to removable Memory Stick Duo cards or Memory Stick PRO Duo cards.
- Quick On police in car video - Missing an important scene can be frustrating, especially if the reason is because your camcorder is turned off. With the Quick On feature, the touch of a single button places that camcorder in Sleep mode. Another push instantly wakes the camcorder, so you'll always be ready to capture police incidents.
- 2000X Digital Zoom / 60X Optical - The optical zoom helps to bring the action close up from far away.
- Universal visor mount fits all police cars.
- 1.0 Megapixel (Gross) Advanced HAD CCD Imager
- Video Resolution : 720 x 480 MPEG2 -
  - When using 16 GB Memory Stick PRO Duo Media (sold separately): High Quality Record Mode = up to 11 Hours or video.
- Optional in cabin suspect microphone (\$149) records the suspects on their own audio channel separate from the officers wireless microphone. So in court you can listen to each channel separately.
- Size of Camera: Dimensions (Approx.) : 2 1/4 x 3 5/8 x 5 1/8 inch (55 x 89 x 130mm)
- Weight (Approx.) : w/o battery: 13oz (390g) w battery: 15oz (440g)
