The remarkable Life Hammer tool was created to help people escape from their vehicles in the event of an accident. Sold in Europe well before it came to the United States, the Life Hammer shatters auto glass and cuts through jammed seatbelts to free passengers from a potentially life threatening situation. Since its introduction, the Life Hammer has been adopted by many law enforcement agencies across the country to rescue entrapped motorists. Be prepared by keeping a Life Hammer in your vehicle!

Res-Q-Me is a small versatile tool that can save your life and your family! This rescue tool is designed to break the side windows and cut through jammed seatbelts. The Res-Q-Me is intended to attach to your keychain so you are always prepared for the unexpected. Res-Q-Me contains a spring loaded steel point that will break any tempered glass window and a stainless steel blade for cutting through malfunctioning seatbelts. The break-apart design allows Res-Q-Me to be quickly removed from its storage location in an emergency situation.
