

Bust A Cap® Products

Bust A Cap has created window-breaking caps to work on your existing batons and flashlights. Our caps are being carried by first responders all over the U.S. and is making a difference. This product was designed by a Deputy Sherriff and is made in the U.S.A. Here is a listing of several products that the **Bust A Cap** will attach to.

ASP Baton Cap

The ASP baton cap has been designed to fit all models that ASP currently distributes. The ASP baton is a light weight expandable baton used by police, government agencies, military, and private security around the world. **Bust a Cap** has no moving parts and can be deployed with either your strong or weak hand.

Winchester or Wilmoth Baton Cap

Winchester turned their patent over to Peacekeeper Products International in 2004 and came up with a new design for a cap. Anyone with an old Winchester (or Wilmoth) will need this cap. Make sure that when ordering this cap, the cap has "male threaded" ends on your old cap. Please verify by looking at the posted picture or contact Public Safety Equipment Company LLC with any questions.

RCB Baton Cap (Rapid Containment Baton)

The Rapid Containment Baton is also known as the "RCB." Make sure when ordering this cap, the cap has "female threads" inside your old cap. Please verify by looking at the posted picture or contact Public Safety Equipment Company LLC with any questions.

Streamlight Poly Stinger & Stinger LED

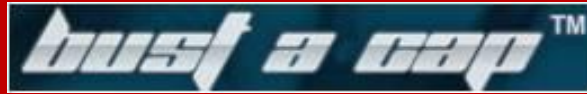

If you carry the Poly Stinger or the Stinger LED, you know the size of these flashlights vary depending on the model. There is no way you can break a window with these flashlights without causing damage to your expensive light or injuring someone from flying glass. Attaching **Bust A Cap** to your flashlight will insure that it will break glass and not damage your equipment. Warning: Please remove the o-rings from the old cap and put on your new Bust a cap to insure that your light remains water tight.

Streamlight Stinger Ultra & Stinger HP Cap

If you carry the Stinger, Ultra Stinger, or the Stinger HP, you know the size of these flashlights vary depending on the model. There is no way you can break a window with these flashlights without causing damage to your expensive light or injuring someone from flying glass. Attaching **Bust A Cap** to your flashlight will insure that it will break glass with just one tap and not damage your equipment. Warning: Please remove the o-rings from the old cap and put on your new Bust a cap to insure that your light remains water tight.

Streamlight SL 20 X LED Cap

If you carry a full size flashlight, like the Streamlight 20 X LED, the cap alone will not break glass. There is no way you can break a window with these flashlights without causing damage to your expensive light or injuring someone from flying glass. Attaching **Bust A Cap** to your flashlight will insure that it will break glass with just one tap and not damage your equipment. Warning: Please remove the o-rings from the old cap and put on your new Bust a cap to insure that your light remains water tight.

Streamlight SL-20XP Cap

If you carry a full size flashlight, like the Streamlight 20 XP LED or the Streamlight 20 XP Poly, the cap alone will not break glass. This flashlight is made out of a Polymer case, which as you know, feels like plastic. There is no way you can break a window with this flashlight. Attaching **Bust A Cap** to your flashlight will insure that it will break glass with a simple "tap," virtually adding no weight.
